SECRET/NOFORN-SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

CRV Session Procedures Report (S/NF/SK)

Control Number	:	8706
Date of Session	:	07Apr87
Date of Report	:	07Apr87
Source Identifier	:	003

1. (S/NF/SK) Tasking: See tasking data sheet, attached. No further instructions received.

2. (S/NF/SK) Session: A good deal of session time was spent discussing source PI's (psychological, not physical). Nevertheless, session felt copacetic to monitor; rapid target acquisition combined with many indicators. Source suspected possible AOL with regard to the idea of SDI, but said that it did feel like signal line. Source produced the word "unfinished" early in S4 and was instructed to turn his attention in that direction because he was probably on the target.

3. (S/NF/SK) Summary: AI of "fascinating". A "technical" structure under construction in a remote area with green hills and water. [It is huge, airy, flat, tapered, rounded with a platform, (perhaps for landing helicopters).] (See source sketch in session notes). Installation involves complex electrical/electronic systems, as well as a "core". Source perceives this site to be "the answer to SDI". See session notes for amplifying data.

4. (S/NF/SK) Feedback: Source was informed that he was probably on target but that the monitor would require additional instructions in order to proceed.

SiteAppraxedFor Release 2000/08/08 : CIA-RDP96-00789R000300420001-2
Structure under construction in a remote
area w/ vegetation + water nearby. Structure is large, very
flat, tapered, rounded with a platform inserted - perhaps
for landing helicopters. Construction is underway - unfinishe-
material - mainly metal in being up to work on structure [bot]
above + below platform. Complex electronic + electrical systems must
be in place before rest of work can be completed. Structure
involves weapons syst. control, with a shielded connect. Impression
of connector + response to SDI - a word - 3 received or offensive.
Large loads of radiant pulsing energy both being sent and
received + defended against seems an important concept to
the Site. (Site) is North-south oriented primarily in a
non-physical sense, and is designed to operate in
whole scope over immense distances.
